HARMAN KARDON® HKTS 220SUB

Powerful, down-firing subwoofer with built-in 200-watt amplifier and easy-to-use wireless connection

Harman Kardon® HKTS 220SUB

Bass is the foundation of great sound, heard in your ears but felt from your head to your toes. The Harman Kardon® HKTS 220SUB is a wireless subwoofer with a built-in 200-watt amplifier that maximizes the feeling while enhancing your entire sound experience. What makes you feel the music in a professional venue is the same feature that will make you experience it at home: powerful amounts of low-frequency bass. The Harman Kardon HKTS 220SUB subwoofer delivers powerful, nearly tangible deep notes and effects that do more than thrill your ears; they practically lift you out of your seat. Using a down-firing, 8-inch (200-millimeter) cone transducer, the subwoofer delivers an astonishingly immersive feeling. And since it's wireless, the HKTS 220SUB reduces the clutter of cables in your home theater.
