

2000SERIES

REDEFINE THE POSSIBLE

"some of the most forward-thinking products in existence."

What Hi-Fi? Sound and Vision November 2009

The Q Acoustics 2000 Series

Following the astonishing success of our 1000 and 1000i ranges, we again challenged the world's most renowned loudspeaker engineers to design new models that deliver both unrivalled sonic performance and breathtaking value for money. In other words, the very best affordable loudspeakers ever produced.

Oh, and we demanded the new speakers be very stylish as well.

With the all new Q Acoustics '2000 Series' our designers have surpassed themselves. Already 'What Hi-Fi? Sound & Vision' magazine has bestowed its prestigious 'Product of the Year' award on the 2000 series 5.1 loudspeaker package and also anointed the compact bookshelf 2010 model 'Best Stereo Speakers up to £150'.

We demanded unrivalled sonic performance and breathtaking value for money. In the award winning 2000 Cinema Pack, our designers have transcended their previous achievements. Its precision soundstage, powerful dynamics and rich deep bass make it the natural choice for both home cinema enthusiasts and discerning music lovers.

"utterly absorbing, detailed and cohesive sound."

"impressive punch and power."

What Hi-Fi? Sound and Vision November 2009

2010 **Compact Bookshelf Wallmount Speaker**

This award winning ultra compact bookshelf speaker sets new standards for sonic performance in its class. Boasting class leading distortion levels, it is suitable for both hi-fi music and home cinema use and is an ideal match for the 2000C centre speaker and 2070S subwoofer.

The 2010 can also be stand or wall mounted, using the dedicated 2000ST stand or 2000WB wall bracket.

*"thrill with vigour and authority."
"engaging without ever lacking control."*

What Hi-Fi? Sound and Vision Awards Edition
November 2009

2020 **Bookshelf/Wallmount Speaker**

A medium sized bookshelf design that exudes quality. The beautifully finished, low resonance cabinet encapsulates the 25mm ferro-fluid cooled tweeter and precision engineered 125mm bass driver to produce a speaker with extended bass, an open mid-range, astonishing transient response and exceptional high frequency clarity. The 2000ST or 2000WB allow the 2020 to be stand or wall mounted.

2050 Floorstanding Speaker

Visually striking in the new Piano Black high gloss finish, the 2050, the exquisitely proportioned flagship of the 2000 Series, is both sonically and aesthetically enhanced by its integral steel plinth with 'top configurable' floor spikes. Twin 165mm drivers deliver exceptional bass extension, midrange openness, clarity and smooth detailed high frequencies. They are ideal for both music and high energy movies. The overall sonic performance of this outstanding loudspeaker belies its affordable price.

2070S **Subwoofer**

Unusually at its price level, the Model 2070S subwoofer is a completely DSP (Digital Signal Processing) driven system with highly efficient Class D amplification. However this has meant we have been able to achieve an advanced level of functionality, as well as optimising the sonic performance, by undertaking all filtering and limiting completely in the digital domain.

An example is the 'Speaker Type' function switch, which alters the characteristic of the subwoofer's frequency response at the crossover point. This allows the subwoofer to be optimised for use with either 'ported' speakers, like the rest of the Q Acoustics range, or infinite baffle models.

2000C **Centre Channel Speaker**

A centre channel speaker with twin 100mm bass drivers and a ferro-fluid high frequency unit to acoustically match and complement any of the 2000 Series. Removable rear port bungs means it can deliver its outstanding, seamless performance whether it is bookshelf, stand mounted or wall mounted by using the 2000WB wall bracket.

2000ST Speaker stand

The 2000ST speaker stand is designed specifically for the 2010 and 2020 loudspeakers. Precision laser-cut steel construction and acoustic damping foam inserts ensure quality and performance to complement the loudspeakers. Q Acoustics' unique spike adjustment means spikes can be adjusted from the top, making speaker levelling simple without the need for visible fixings or obtrusive lock-nuts.

Features:

- Top adjustable lockable spikes
- Integral cable management
- Acoustic damping foam inserts within columns
- Top plates for the 2010 and 2020 loudspeakers included
- H/W/D mm: 586 x 240 x 300

Colours available:

Gloss Black and Gloss White

2020	45°	35°
2000C	45°	0°

2000WB Wall Bracket

The 2000WB Wall Bracket is a unique 'Tilt and Turn' loudspeaker bracket which is adjusted via a single Allen bolt and allows the 2010, 2020 and 2000C models to be mounted almost flat to the wall or angled down and/or sideways. Unusually, each bracket comes complete with a matching bottom plate that neatly covers all the terminals and cables for a perfect visual finish. It's simple to use, offers flexible positioning, hides the cables and looks great.

Features:

- 'Tilt and Turn' loudspeaker bracket
- Mount speakers almost flat to the wall or angled down and/or sideways
- Bracket comes complete with a matching bottom plate that neatly covers all the terminals and cables for a perfect visual finish

Q2000 Finishes

The appearance of the new Q2000 Series makes a striking design statement. All the cabinet dimensions have changed, so each speaker appears to present a slimmer and deeper profile. As well as traditional 'Graphite Black' and 'Walnut' finishes, at a small extra cost, the new 2000 models are available in beautiful 'Piano Gloss Black' and 'Piano Gloss White' finishes.
